

CXT EXPLORER
LIFT ANYWHERE

ONE CRANE – DOZENS OF APPLICATIONS

The Konecranes CXT Explorer is an affordable, strong and portable solution for all kinds of lifting needs. This crane follows you practically wherever you need to lift up to 6.3 tons.

MOBILE

You can easily transport the CXT Explorer inside or outside. It only takes a few hours to set up or dismantle the crane.

COMPLETE

The CXT Explorer is sold and delivered as a predesigned package, so the delivery process is fast. All of the crane components arrive at your site in one standard ISO shipping container.

SAFE

A stable and reliable crane you can operate from the ground makes your lifting safer and more accurate, and lowers the risk of damage or collision.

SERVICE

Comprehensive service programs, spare parts and fast service response save you time and money.

PRIMARY APPLICATIONS

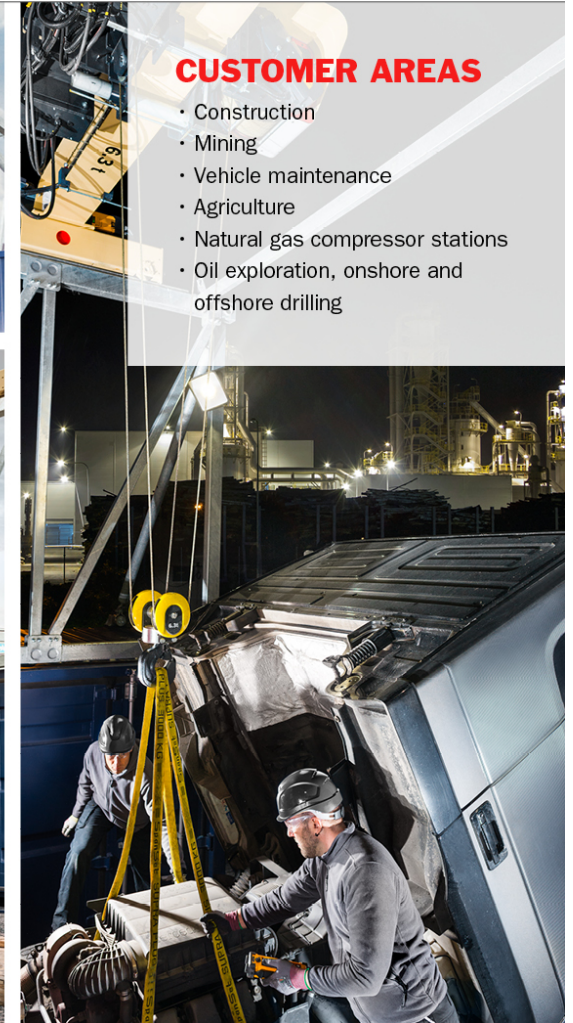

The CXT Explorer brings safety and easy lifting from the workshop to the field. You can repair and maintain your vehicles and other equipment without the expense of transporting them away and back again. In addition, it offers many other opportunities for increased efficiency in remote locations.

- Working with large or heavy materials
- Maintaining heavy machinery or equipment
- Loading and unloading
- Moving industrial equipment, vehicles and other items

CUSTOMER AREAS

- Construction
- Mining
- Vehicle maintenance
- Agriculture
- Natural gas compressor stations
- Oil exploration, onshore and offshore drilling

READY TO LIFT IN A FEW HOURS

You can easily transport the CXT Explorer together with another ISO shipping container. Put the containers on the ground, build the supporting steel structure on top and secure it with twistlocks. Add the crane and plug into grid power or a generator. Now you have factory-level lifting just a few hours after arriving on-site. When you want to relocate the crane, just pack it back into its container and move out.

SAFE LIFTING IN ALL KINDS OF ENVIRONMENTS

Lifting with an industrial crane is easy and a lot safer than using mobile cranes. The CXT Explorer is a stable industrial crane that you can operate from the ground. It makes lifting safer for operators and lowers the risk of damage or collision.

The crane is equipped with thermal and weather protection and is designed to operate safely in extreme climates and on demanding terrains.

A FULL-BLOWN MAINTENANCE WORKSHOP

We have put standard lifting equipment into one long-distance shipping container to bring you a predesigned package with a carefully-selected range of standard functions and optional extras, designed for all kinds of lifting needs. Inside a second container, you can store all your service tools, important equipment and spare parts.

To shield your maintenance workshop from the elements, we can provide a tent or rain covers for the whole crane area.

THE MOST ESSENTIAL COMPONENTS IN ONE PACKAGE

The CXT Explorer is specialized lifting equipment from one of our standard crane families, the CXT product range. All the key mechanical components are designed specifically for cranes, and are manufactured and assembled in-house by crane experts, so you know the CXT Explorer is a top performer.

With over 10 years of continuous improvement since our CXT range was launched, and hundreds of thousands of units sold, the product has been proven even in the most extreme weather and environment.

This means that many of the extra features available on other CXT cranes are also available for the CXT Explorer. With comprehensive optional features and add-ons, it can be tailored to match your requirements.

CXT electric overhead crane (1, total weight approx. 1250kg, lifting capacity 6.3 tons)
